🔷 INTERNSHIPS AND PROJECTS

Projects

Portfolio (Duration August 2024 - September 2024)
This project involves creating a personal portfolio website using the MERN stack, which consists of MongoDB, Express.js, React, and Node.js. The primary goal of the portfolio is to showcase my skills, projects, and experiences in a visually appealing and user-friendly manner. This portfolio will serve as a digital business card for potential employers, clients, and collaborators, allowing them to understand my professional background and capabilities.
Skills used - HTML,CSS,Javascript,React.js,Node.js,MongoDB,Express,UI Development,Material UI

A book store app (Duration May 2024 - June 2024)
The Book Store app built with the MERN stack (MongoDB, Express.js, React, and Node.js) is a dynamic web application designed to enhance the online book shopping experience. At its core, the app allows users to browse a wide selection of books, search for specific titles, and view detailed descriptions. Here?s a breakdown of its features, architecture, and user experience: Key Features User -Friendly Interface: The app provides an intuitive interface where users can easily navigate through various categories of books, view them in card or list formats, and access detailed information about each book. Search and Filter Options: Users can search for specific titles or filter books by genre, author, or price range, making it easier to find what they are looking for. Shopping Cart Functionality: Users can add books to their cart, view the total price, and proceed to checkout. The cart updates dynamically as items are added or removed. Admin Panel: Admin users have access to a dedicate
